degreaser, and
sanitizer cleaner**

**Phosphate-free,
NPE
(nonylophenols)-
free**

DIN: 00343471

**Agriculture and
Agri-Food Canada**

**Food Production
and Inspection
Branch**

**Approved for use
in food
processing
establishments**

Bulletin technique

General Introduction

Highly effective for both routine maintenance and heavy-duty work, U-974 possesses unparalleled cleaning and degreasing power. Furthermore, it is safe for all surfaces: floors, walls, countertops, etc. Also, given its disinfecting power, U-974 deodorizes and sanitizes by eliminating odor-causing bacteria. For certain jobs where greasy dirt is the cause of, among other things, the formation of microorganisms: algae, fungi in humid areas (moss), U-974 is the ideal cleaner-degreaser since it has the power to destroy these bacteria. U-974 is also approved by Agriculture Canada for use in food processing facilities, particularly in establishments registered under the Canadian Meat Inspection Act.

Specific qualifications and performance

Drug Identification Number:
D.I.N. # 00343471

The three main operations are found in a single product: cleaning, degreasing, and disinfection. U-974 is the product to use wherever greasy substances need to be removed. But also when it's necessary to DISINFECT.
