

PROCHEM.

Filter-Out

This product's exclusive chemical technology aids in the removal of dark filtration soil lines along walls, doorways and near heating and air conditioning vents. It works by canceling particle charge attraction, allowing the soil to be extracted away. Also aids in the removal of ink toner powder spills, carbon-containing soils, carbon soot, fingerprint powder and other charged particle soils.

Review these [Tech Tips](#) for expert guidance on spot and stain removal.
