

STONE CARE

STONE GLOW *Concentrate* HARD SURFACE CLEANER

SAFE ON
STONE, GLASS & WOOD

MB-15

pH
NEUTRAL

streak free, clean scent

EASY
CLEANING

MB-15 Stone Glow Concentrate is a highly concentrated pH neutral cleaner for all hard surfaces, including ceramic, porcelain, all natural stones, wood and glass regardless of honed or polished finish. StoneGlow is a superior, no rinse neutral cleaner and it can be used by homeowners and professionals alike. It is safe to use as a daily cleaner with mop application, as well as in commercial utilities with polishing/grinding machines and auto scrubbers.

APPLICATION:

Stone, glass & wood

Mix approximately 1 to 3 fl. oz. (4 to 12 capfuls) according to the level of soil on the floor - with 1 gallon of warm water, then mop as usual or apply with machine. DO NOT rinse.

DO NOT use more product than the proportion indicated. Though no damage would occur, rinsing would be necessary. If using for counter top cleaning, apply diluted product from spray bottle or bucket. Wipe with a clean absorbent cloth, micro fiber or damp sponge. Surfaces that come in contact with food require a potable water rinse; otherwise rinsing is not usually necessary.

SPECIFICATIONS:

Appearance.....	Colorless Liquid
Odor.....	Pleasant Odor
Specific Gravity.....	0.96
7pH.....	7.5
Boiling Point.....	Near 212°F
Flash Point.....	96°F
Water Solubility in Water.....	Complete
